

## The Analysis of Food and Drugs Volume 1-2

By Thomas Hames Pearmain

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1897 Excerpt: .of the suspected water with an equal volume of ether, which is then separated off and allowed to evaporate at the temperature of the room; the residue left after the evaporation of the ether is then carefully smelt. The test may be rendered yet more delicate by distilling a litre and collecting the first 50 c.c. that come over, and treating them with ether as above described. Many natural waters, e.g., peaty waters, give off peculiar and characteristic odours, which are very difficult to describe. The test of smell is, however, very unreliable, and is one into which a great deal of personal equation enters. Absolutely pure water is quite free from odour, but waters from some geological formations occasionally have a faint odour of sulphuretted hydrogen, particularly those from some sandy and clay formations. It must not be overlooked that certain mineral waters contain large...
