*Here is the finest ebook i have got read until now. It really is simplistic but excitement within the 50 percent in the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Did you know many children struggle to learn colors the traditional way: taught side by side, all in one book? With that in mind, the Teach Kids Colors book series takes a novel, science-backed approach to color learning -- one color, one fun book at a time. Inside the green book, your child will meet Clover, a curious elf who searches the world over for green items, from limes to a tree frog to a lily pad, and learns that the grass isn't always greener on the other side. Green Clover, Green Leaves teaches the color green utilizing color-consistent items like leaves, limes, broccoli, peas and more to help kids ages 1 to 5 apply objects to learning colors when they are out in the world with their family -- hiking, grocery shopping, looking in the refrigerator or riding in the car. Perfect for introducing children to colors, Green Clover, Green Leaves is the first book, the green book, in the Teach Kids Colors series. Written in easy-to-remember limericks, each book in the series uses lively characters and vivid illustrations to deliver an uplifting message with a subtle lesson on color, the scientific way -- one color, one fun book at a time. Children love the stories so much they don't even realize they're learning.
